Surface Finish of Metal Parts for VWall
Sconce / Nickel Plated Glossy

Jan Plecháč and Henry Wielgus sketched the shape of the Lasvit Neverending Glory chandeliers by rotating a silhouette around its own axis. In the individual silhouettes, it is possible to recognize iconic chandeliers from five of the world's most eminent concert halls and theatres; La Scala in Milan, Palais Garnier in Paris, the Metropolitan Opera in New York, the Czech Republic's Estates Theater in Prague, and the Bolshoi Theater in Moscow.

Designed by Jan Plecháč & Henry Wielgus

Surface Finish of Metal Parts / Lacquered
White Matt / Polished Stainless Steel

Certainly not from the Stone Age but closer to the fictional Kryptonite, Crystal Rock appears in the cave of the future as an ambassador to the fusion of nature and man, light and reflection, transparency and mass. All these characteristics are gathered within a perfectly cut, yet roughly sculpted contemporary silex. Its multiple reflections and deflections fascinate onlookers during the day and even more at night, when lighted.

Lighting Collections

CRYSTAL ROCK

CIPHER

The Cipher collection is a juxtaposition of traditional techniques and contemporary form. Its delicate hand-blown crystal cylindrical pieces are cut with clean, clear lines. Light emits only from connection points and the sources are ingeniously hidden to soften the overall effect. With components arranged in series and joined by polished champagne-gold finished connections, Cipher's overall linear form creates a poetic visual rhythm. As a system, the Cipher collection is extremely flexible and customizable, with limitless possible configurations for private residences and bespoke installations projects.

Primary Material / Lythialin
Surface Finish of Metal Parts /
Lacquered Black Matt

It's said that a sphere is the most perfect shape in the universe. One can sometimes discover the whole universe within this one shape. The variability and immeasurable beauty of the Universe is captured in Spacey thanks to a special technique called lithyalin. It looks like gemstone, yet it is actually glass. This technique was invented in Northern Bohemia more than 200 years ago and has now been resurrected in the same region by a Czech designer.

Designed by Lukáš Novák

SPACEY

GLOBE METRO

Colored tiles with a hemisphere in their center were the initial inspiration for the Globe–Metro chandelier. These tiles were created in the 70’s for Prague’s metro and Cyril Dunděra, who lives in Prague, had their image in mind when he started to conceive the lighting. *“The tiles in the metro were always a great example of applied art for me. They look great, can shatter sound, and even distinguish each station by their color,”* explains the designer.

32 11/16" x 23 5/8" x 23 5/8"

Primary Material / Hand Blown Glass
Color / Clear, Smoke

Volcanoes are the best representative of the fire element on Earth. And what other material would better reflect this element than glass, which is born of fire as well? The glass is blown into the form of a special texture which resembles the surface of the landscape around volcanoes where lava cools down and hardens. The lighting plays counterpoint to Velčovský's previous lighting collection – Frozen. While Frozen was inspired by ice and its myriad sculptures, the Volcano is inspired by the many shapes of fire.

 Light Source / LED Custom 10 W

Duna was inspired by the coherent yet abstract logic of dune formations that defy traditional Cartesian geometries. Its design concept is realized in a three dimensional, asymmetrical pair of intersecting glass forms. The striated surface of the crystal glass produces ever-changing effects of reflection and refraction. Narrowly directed light sources beam light through the mass of glass into the entire glass element, highlighting its geometry.

PRESS

One of the influences which shaped modern Japanese design was the Mingei (Folk Crafts) Movement. It emphasized the pursuit of practical beauty as well as the universal appeal of everyday craftwork design. Still present in contemporary Japanese design, these approaches affected also the design of Press Lamp. Here, glass tubes are pressed as though they have been pinched, and the light source is fitted into the narrowed space. It does not rely on a metal mould, the compression of the glass produces a soft, organic form and imbues each lamp with a singular appearance.

René Roubíček's chandelier designed for Lasvit named by its author "And Why Not!" refers to his lifelong experimentation and searching for compositions and forms incarnated in glass. The chandelier's emotionally intense sculptural form resembles a flash and is an evolution of Roubíček's core designs based on dynamic abstraction. Light gliding on large, smoothly polished surfaces while absorbed by the mass of the glass creates a unique atmosphere.

Designed by René Roubíček

LUDWIG

The design of the Ludwig collection strives to establish balance between past and future. The bygone romantic era with its neoclassical proportions is reinterpreted with essentially slick, streamlined forms. While the contours remain loyal to their neoclassical style and chandelier references, the use of industrial glass tubes imbues this family of spectacular lights with an airy and strikingly modern elegance.

DROPLETS

Inspired by nature, emotion and a unique frozen moment, this lighting sculpture reminds us of our fascination with water. It captures the perfection of the natural movement when water collects into a drop. The entire composition, as well as the individual elements and their shapes, play with the magic of water, air and gravity. The harmonious density gradient highlights this instant, providing sensations of depth and motion.

As if trying to systematize the chandelier-making tradition, Moritz Waldemeyer took the geometrical shape of the classic chandelier outline and turned it into a diamond-like hexagonal glass unit. On its own, with just one single pendant, or in combination of multiple items into a large chandelier, the Facet components stand out as clear, disciplined and geometrical.

Designed by Moritz Waldemeyer

LASVIT is a Czech-based designer and manufacturer of bespoke lighting installations, lighting and glassware collections and glass objects. Since its foundation in 2007, the company's mission has been to inspire the world with the beauty of Bohemian glass.

LASVIT has been cooperating with many of today's design stars and has become an influential company that is often the first step in the budding career of young and talented designers — the design stars of tomorrow. Since 2011, the creative style has been set by designer Maxim Velčovský. Their original design approach won LASVIT the “design Oscar” at Salone del Mobile 2018.

LASVIT is a young company, yet it builds on the long history of glassmaking in Northern Bohemia. The founder of LASVIT, Leon Jakimič, has great respect for the glassmaking tradition, but also enthusiasm for cutting-edge design and modern technologies.
